Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 41-45, 47 and 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Cox et al (US 3,583,391).

Cox et al disclose an elongated member (1) having a passageway; a flexible sleeve (4) disposed in the internal passageway of the elongated member (see Figure 2) and with a part of the sleeve fixed at a location outside of and separate from the elongated member such that when the elongated member is moved in a distal direction, a distal part of the elongated member engages the sleeve and unfurls it between an outside surface of the elongated member (see Figure 6).

As to claim 43: wherein the sleeve is affixed against movement relative to a distal end (5) of an introducer member (8) through which the elongated member is inserted (See Figure 2);

As to claim 44: see column 3, lines 47-50, wherein the sleeve as disclosed by Cox et al is fully capable of being splittable;

As to claim 45: see Figure 8, portion 32 of the device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3767

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 46 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fogarty et al (US 4,479,497).

Cox et al disclose the claimed invention except for the sleeve being pleated when within the elongated member. Fogarty et al teach in Figure 2 that it is known to load a sleeve in a pleated manner (32) into an elongated member. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the device of Cox et al by loading the sleeve into the elongated member in a pleated manner, as such a modification would allow for more efficient loading of the sleeve within the elongated member, allowing the use the option of using a sleeve having a longer length.

Allowable Subject Matter

3. Claims 1-40 and 49 are allowed.

Response to Arguments

Applicant's arguments, see response, filed 10/29/10, with respect to the rejection of claims have been fully considered and are persuasive. The rejection of claims 1-49 under the Hall and Bauer references have been withdrawn.
